September 1, 2017

Dear Home Wine Makers;

Once again, it is time to clean out the barrels and carboys and prepare for another grape juice season. The 2017 growing season has finally been something close to normal. Another mild winter has aided the reestablishment of our hybrid varieties Vidal Blanc and Corot Noir. The Vidals are providing us with about 75% of a crop but the Corot will be another year to fruiting. In addition to the Vidal juice being available this year, a new grower in Medina Co. will be supplying us with Traminette, a hybrid with characteristics similar to gewurztraminer. We are also assured of a plentiful supply of Chambourcin this fall, so the opportunity of acquiring fruit to ferment on the skins in 6 gallon bucket lots (you supply the bucket) will happen again.

We also completed all the replanting of the acres that was lost to the polar vortex winters. The hardier hybrids include Marquette (red), Frontenac Gris (grey grape, white wine), Prairie Star (white) and since I am a glutton for punishment, an acre of riesling. We've also planted an acre of catawba since there are none left grown locally. We are hopeful that some of these new vines will provide a small amount of fruit in 2018.

We will be raising prices slightly this year. About \$.25 per gallon on most of the varieties. It is needed to help us in staying solvent and to continue to exist in our prime location. Thank you for your understanding.

Listed is a tentative schedule for calling in orders. Remember, this schedule is unpredictable and doesn't necessarily mean the juice will be here on those dates. The dates listed indicate the earliest we may have that particular juice in stock. Anyone who arrives without an appointment will not be guaranteed the type or quantity of juice desired. So please call 440-933-6666 between the hours of 10 to 6 daily, except Sundays and holidays. Also, we will not schedule orders for less than five gallons, nor will we fill a 5 gallon order in one gallon jugs.

Juice For Wine making	Begin calling on:	Price per Gallon
Delaware	9/8	\$8.25
Niagara	9/8	\$7.25
Seyal Blanc	9/11	\$8.75
Traminette	9/11	\$7.50
Fredonia	9/11	\$7.25

Juice For Home Wine Makers

Juice sold for home winemaking has sulfite added at the crush and is chilled and settled for a nearly clean finish. In most instances, pectic enzymes are used to enhance the clarification. Sugar and acid levels are not adjusted. However, we will be glad to tell you what the sugar and acid levels are in the juice that you purchase. We do not sell plastic jugs, barrels or any home wine-making supplies, but we do supply the wine yeast at the time of your juice purchase.

Juice To Drink Fresh

Concord juice will be available by late September. It is pasteurized and bottled at Grobe Fruit Farm and contains the preservatives Vitamin C, Potassium Sorbate and Meta-bisulfite. Also, it must be kept refrigerated. The suggested refrigerated shelf life is 6 months for unopened bottles. It can also be frozen and makes great jelly. This juice can be purchased during business hours, which are 10 to 6 daily, closed Sundays and holidays.
